#### DETAILED ACTION

# Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 12/20/01 was considered by the examiner.

# Specification

2. The disclosure is objected to because of the following informalities: Claims referred to in the specification on page 3, lines 24-25 ("claim 1" and "claim 21", this should be deleted and replaced with what they (claims 1 and 21) stand for.

Appropriate correction is required.

### Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim's 36-39 recites the limitation "the coating" in line 1 of all claims. There is insufficient antecedent basis for this limitation in the claim. It is unclear to what coating applicant is referring to.

#### Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this

Art Unit: 3676

subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 21, 30-31, 34, 36-39, 40, 42-44 rejected under 35 U.S.C. 102(b) as being anticipated by Hasegawa (JP 409287663 A).

Hasegawa discloses a gasket comprising:

at least one metallic layer including at least one gasket opening and at least one bead (figure 3);

a deformation limiter including at least one filler and one bonding agent;

wherein a mass portion of the filler is greater than a proportion of bonding agent (this is the case since metal powder is a main component of a composite material composed of resin, organic substance and metal powder);

wherein each particle of filler has a small surface area in relation to a volume of the particle (this is the case since it is relative to the surface and volume of a filler, it is well know in the art that metal powder have a small surface area in relation to a volume of the particle);

the particles consist of metal, an alloy, a resin, a ceramic and mixtures thereof; the bonding agent is a thermosetting material;

the coating is arranged in a bead;

the coating is applied on a first metallic layer near the bead of a second metallic layer (figure 8);

the coating is applied on two facing side of a metallic layer (figure 7);

the coating is applied in the form of a line of uneven width or height or shape;

Regarding the method, the method is inherent and disclosed by the reference.

Regarding claim 44:

Art Unit: 3676

a coating (4) including a particulate filler and bonding agent, wherein the coating includes, by weight, more filler than bonding agent.

# Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 27-29, 32-33, 35 and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hasegawa in view of Zerfass (DE 3611285 A1).

Hasegawa disclose the invention substantially as claimed above but fail to disclose the particles have a smoothed, rounded surface or are spherical, the particles have a grain size in the range between 5 to 100 micrometer, an additional thermoplastic addition, a mass ratio of filler to bonding agent is at lest 2:1 or 9:1. Zerfass discloses a screen-printable epoxy resin having particles of grain size in the range between 5 to 100 micrometer, an additional thermoplastic addition (abstract of Zerfass) and a mass ratio of filler to bonding agent is at lest 2:1 or 9:1. It would have been obvious to one having ordinary skill in the art at the time the invention was made to configure the deformation limiter of Hasegawa to have particles of grain size in the range between 5 to 100 micrometer, an additional thermoplastic addition and a mass ratio of filler to bonding agent is at lest 2:1 or 9:1 as taught by Zerfass, to provide a deformation limiter with high-pressure and heat resistance (abstract of Zerfass).

Regarding claim 28:

Application/Control Number: 10/019,472

Art Unit: 3676

As to claims 28 examiner takes official notice that particles are spherical is old and well known in the art.

#### Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nicholson, Nippon Resins, Omura, Ueta and Majewski et al.
